50X1-HUM

The information that no construction was observed at the field is believed to be credible. It is possible that the aircraft were in the hangars on the day of observation. However, it is doubted that the aircraft are bombers, although another source also reported previously that bombers were stationed at the field.

50X1-HUM

The field was occupied until late 1949 by the 30th GA Regt equipped with IL-2s. This regiment is still believed to be stationed there. It is possible that civilians confused ground attack aircraft with bombers.
